

Software Off shoring and Outsourcing should be made easy to support companies in their growth

1.1 Who are we?

coMakeIT is your Offshore Development Partner. We help IT companies set up and extend their R&D departments by providing software development services out of our Software Development Center in Hyderabad, India. We believe Software Development is a team effort, which is implemented best when it is an integral part of your company. Based out of India and Netherlands, coMakeIT specializes in providing R&D expansion services for Product Software Companies, based on a leasing type. coMakeIT offers you to take the complete product realization and support process out of your hands. This way you can focus on conceptualizing new ideas, and stay in close contact with your customers

Because of this, we base the service we deliver on three unique foundations:

- Customer Dedicated Teams
- Agile Software Development Techniques (SCRUM)
- Transparent Governance Structure

1.2 Our Mission

coMakeIT wants to be your partner in realizing growth by offering hassle free, scalable and flexible offshore outsourcing capabilities, setting new standards for high degrees of professionalism and transparency.

1.3 Why coMakeIT

With a vision to help software product companies accelerate their product development without compromising on their IP, coMakeIT has embarked a journey to have software products First Time ready!! Our strength is our core management team that has been working together for more than a decade in solving the most complex off shoring situations for small to large companies involved in building software products. We learnt that Software Development Methodologies (like Agile and SCRUM) and peoples skill sets are key, but that the people themselves are even more attrition important. They are your most important investment, both in knowledge and skills. We are able to keep teams, departments and companies together and make them outperform themselves, based on our extensive Human Capital Development focus. This will amongst many other benefits result in lower

1.4 What does our business mean to you?

If you see business opportunities and are seeking for ways how to implement them we can be of assistance. When you think investing in people and in knowledge and skills of those people is important, you have found your partner to implement this. When continuity in people and in their performance is what you are looking for, we are there to set this up for you.

1.5 Product Development Lifecycle -Right Solution for Right Stage

Offshore partner coMakeIT has three models of outsourcing that are based on the product life cycle of software. These three models help provide software product companies choose the one that fits their need. Teams at coMakeIT are flexibly created to extend partnership and hand in glove approach for its customers. This ensures Software Product Offshoring to be made more easy and Extends Possibilities.
