

# co-Create future-ready software products

Full spectrum of engineering services for the complete product lifecycle

## Product Engineering Portfolio

### New Product Innovation

- ◆ Minimum Viable Product (MVP)
- ◆ Product 1.0
- ◆ Reference Architecture

### Continuous Product Innovation

- ◆ Iterative Product Development
- ◆ Test Automation
- ◆ Agile & DevOps Implementation

### Product Implementation

- ◆ Product Deployment
- ◆ Product Integrations
- ◆ Customizations & Enhancements

## Technology Practices

AI, ML

IoT

Cloud

Web Technologies

Experience Design

Application Architectures

Low Code Platforms

## Powered by Innovation Accelerators

TOP Cloud™ (Team Operations Platform)

Technology Innovation Center (TIC)

Center of Excellence (CoE)

## Why coMakeIT?

Guaranteed success with Productized services

Faster time-to-market and risk-mitigation

Product & Technology stewardship

co-Creation, an ideal strategy for collaborative product development

Product-thinking and co-Creation

Continuous alignment with customer needs

“ Unlike traditional service providers and their project-driven approach, we offer genuine product-thinking. Our services leverage a unique combination of enterprise-scale product heritage, coupled with product & technology stewardship ”
